New from TA-PO Industries:

The TA-PO 600

This new machine was specifically developed for efficiently separating WEEE scrap. The TA-PO 600 is the new standard in high quality recycling with low carbon footprint and low operating- and maintenance costs.

Key features of the TA-PO 600:

- No handpicking
- Clean FE fraction
- 24/7 online support
- Uses less than 5kW/h
- Only 7m² of floorspace
- In excess of 99% uptime
- High recovery of valuable metals
- Smart design for quick belt change and maintenance

THE NEW
**TA-PO
600**

The new TA-PO 600 will be available for testing.
